## *Industrialisation and Technology Transfer Manager*

*Reporting to: Director of Operations*

*Department: Operations | Location: Sheffield/Oxford*

Faradion Limited is a leader in the development and commercialisation of next generation environmentally sustainable rechargeable batteries. It has established research and development facilities at two UK sites, Oxford and Sheffield, has a growing IP portfolio and a committed team of scientists and engineers.

At Faradion we build the right teams in the right way. We're a bold decision-making team who want to be the best at what we do, who are committed to excellence and helping our people grow by creating specialised, focused and hardworking teams. Teams who apply critical thinking, and who are always striving to achieve excellence in the work they deliver. We look for entrepreneurial thinkers and doers. Innovative, collaborative and motivated people who are excited by our technology, and proud of the difference they can make.

### **About the Role**

In this role you will manage the Industrialisation process covering PCAM, CAM and cell manufacturing, in multiple locations simultaneously. You will be responsible for designing the technical transfer package to meet the needs of the business and ensuring the needs of our stake holders are met through the delivery of information on time and in full. The management and mitigation of process risks is critical for a successful startup.

You will work closely with manufacturing partners and our R&D function to ensure all required and relevant information is captured, compiled, authorised and issued in line with programme timelines.

Within Faradion, you will be part of an integrated, global, team where you will support our operational readiness, scale-up and transfer programme. This will require ownership of the Technical Transfer process for successful start-up of manufacturing assets. Fostering a strong link with our parent company to ensure that the needs relating to technical transfer are met, and that handovers are successful.

### **You will have:**

sustainable technology

energy security

safety

performance

- Either a Bachelor of Engineer or Bachelor of Science degree
- A strong experience in technical transfer to manufacturing environments
- Experience in transferring technical products from Laboratory to Manufacturing environments
- Demonstratable knowledge and understanding of chemical processes.
- Proven experience in team management, both direct and indirect
- Previous exposure to trial design
- Experience of programme, project and workstream planning

### You will be:

- Expected to lead, and manage, the Industrialisation and Scale-up requirements on a global basis.
- Driving the trials program ensuring the target data is generated on time and in full
- Required to develop and implement a technical transfer process whereby all data can transact through Faradion to our stakeholders.
- Responsible for maintaining a risk log and support development of mitigations.
- Expected to develop strong relationships with our manufacturing base and our parent company.
- Responsible for ensuring that data is captured, compiled and authorised appropriately prior to transfer.
- Expected to interface between technology (R&D), pilot operations, quality testing and full-scale operations for material trials, development and technical transfers (including vendor trials)
- Able to work within a PMO process providing updates on the Scale-Up transfer programme.
- Expected to support establishing Faradion as a centre of excellence for Na-ion battery technology.
- Expected to travel internationally and between company sites (Sheffield/Oxford, Mumbai/Jamnagar in India) on a regular basis.

### What's in it for you...

At Faradion, we're passionate about creating a forward-thinking, dynamic work environment. Our employees are our greatest asset, and we're dedicated to fostering an atmosphere that is not only rewarding and stimulating but also enjoyable.

Beyond the fulfilment of contributing to critical projects that make a tangible impact on the world, we provide a host of benefits designed to complement your professional journey with us:

- Competitive salaries
- Market leading Salary Exchange Pension (up to 10% Faradion contribution from a 5% contribution from you)
- Group Life Assurance (5 X basic annual salary)

- Healthy extras – a comprehensive employee assistance programme
- Annual leave buying and selling scheme
- Birthday leave
- Free fresh fruit
- Incredible opportunities for development and career growth
- Eye care vouchers
- Exclusive discounts with leading retailers
- Employee social events
- Wellbeing ambassadors
- Casual dress

***In line with our company values, we are looking for someone who:***

- Demands the highest levels of safety, has a 'safety first' approach, through passion and pride and always challenges the status quo (Safety & Wellbeing for all)
- Has a responsive, 'can do' attitude. Someone who is flexible, co-operative and has an enthusiastic attitude to work. We're candid in calling out actions that work against our values and culture (Commitment)
- Will challenge the norm to make a difference. Be passionately curious and thrive on change and continuous improvement. Be an independent thinker and take ownership for their own development, capacity to grow and knows no boundaries (Innovation)
- Can work collaboratively and inclusively, acting with integrity and takes responsibility for past actions, admit mistakes and will work to fix them. (Collaboration)
- Always acts responsibly and with integrity, treat others well, trusts and can be trusted, is candid and honest (Integrity)
- Applies critical thinking, and who are always striving to achieve excellence in the work they deliver (Excellence)

Join us at Faradion, where your work has meaning, your contributions are valued, and your career aspirations are nurtured.
